Temperature Checks

Point-of-Entry Health Checks to Keep your Employees Safe

Whether you are preparing to re-open or operating as an essential business, let Maxim Healthcare Staffing Services, Inc. help keep your workforce safe during the COVID-19 pandemic. With over 30 years of experience in healthcare staffing, we are ready to support all businesses, large or small, set up an effective Point of Entry (POE) screening program today.

5 Key Benefits of our POE health check program

1. Put the health and safety of your employees first.

A series of pre-screen health questions will be made available for the employee to complete before an employee even enters the temperature screen area.

2. We know healthcare.

With our extensive database of healthcare professionals backed by a strong clinical infrastructure, we are better prepared to partner with you in your healthcare crisis response.

3. Set-up is easier when you partner with us.

Take some of the burden off your own team during an already-stressful time.

4. Get access to daily screening data.

This includes a post-shift review and PPE assessments.

5. Our program is scalable.

We can work to meet your safety and business needs.
